

PRESS RELEASE

December 29, 2020

Marco Meneo is the new CEO of Proge-Software.

On December 16, 2020 Marco Meneo was appointed CEO of Proge-Software.

This is the crowning achievement of his twentyfive-years work experience, gained entirely within the company, which saw him climbing first the technical and then managerial roles, forging a professional caliber of great depth.

Since 2008 he has held the important role of General Manager also assuming ad interim the direction of the Technical dept, thus guaranteeing the company a harmonious growth and a strong rootedness in the founding values, based on "being", but also on "cooperating" and on "communicating".

The appointment therefore comes as a seal of a generational change matured in the right time and with the deepest motivation; it represents the deserved recognition of a role already played with awareness and enthusiasm.

"The big moment has arrived! As Founders we have completed the work and passed the baton to the right people, prepared and aware of their responsibilities, who have fully embraced our moral legacy, allowing themselves to be permeated by our genuine enthusiasm. The Board led by Marco Meneo will be able to give the right speed to company evolution, continuing to guarantee stability and safety to all employees.

Captains of great heart as well as of undoubted value, the Shareholders have confirmed our incomparable president and awarded me the role of "Founder Chairman", a position that will allow me to continue to produce the fruits of my experience. Greetings Marco! Thanks to you, Monica, Roberto and the laudable staff we can continue to experience the wonderful emotion of building the future today. "

Bruno Angelo Meneo - *Founder Chairman Proge-Software*

"I thank my business partners Monica and Roberto, I am honoured by the trust they have placed in me. I face this new challenge with great enthusiasm, ready to make the best of my commitment and take advantage of the passion and ambition that belong to me and that push me to strive for ever more important goals.

I see in Proge-Software an ethically sound company, solid from an economic and financial point of view and with a full internal sharing of strategies and goals. These are the foundations on which my awareness of being able to think big takes strength. A dutiful thanks therefore goes to the founders for the work they have accomplished and for their generous willingness to encourage generational change by stepping aside at the most successful moment."

Marco Meneo - *Shareholder, CEO, Proge-Software*

Since 1985 Proge-Software has been carrying out projects that create value and competitive advantage, becoming a solid reference point for customers and technological partners in the research, design and implementation of innovative solutions in the IT world.

It counts on an expanding organizational structure, with branches in Milan, Hungary and Switzerland, which has recently been enriched with the Sannita branch, set up in the middle of the lock-down period, a clear demonstration of courage, determination and resilience.

It carries out high-tech projects for large and medium-sized enterprises, providing them with all the activities necessary for the design, development and maintenance of the corporate information system: from the design to the management of IT architectures and infrastructures up to the creation of Apps and customized “on premise” and Cloud software solutions, ranging in various fields including: Modern Workplace, Security & Compliance, Software Development, Cloud Adoption, Data & AI.

Know-how, quality level, speed of response and flexibility are the winning weapons of the company's competitive strength at national and international level.
